PROPOSAL 1: HOPE HANDS COMMUNITY CENTRE

1. Organisation Name: Hope Hands Community Centre

History: Hope Hands is a registered non-profit organisation based in Umlazi, Durban, established in 2018. The centre was founded to address educational gaps and food insecurity among youth aged 12-18 in township communities. Over the past 7 years, it has assisted over 500 learners through after-school programs and community outreach.

Mission Statement: To empower disadvantaged youth through quality education, skills development, and nutritional support, creating pathways out of poverty.

Vision Statement: A thriving community where every young person has equal access to learning opportunities and the resources to achieve their full potential.

Target Audience: Primary: Parents and guardians of learners in Umlazi and surrounding areas.
Secondary: Corporate donors, volunteers, local schools, and government funding bodies.

2. Website Goals and Objectives

Primary Goals: Increase volunteer applications by 40% within 6 months of launch.

Showcase donation impact through photo galleries and testimonials to attract corporate sponsors.

Provide clear program information to parents to increase learner enrolment.

Measurable KPIs:

Number of volunteer application form submissions per month.

Donation pages click-through rate and time on page.

Bounce rate below 50% and average session duration above 2 minutes.

3. Current Website and Competitive Analysis

Current State: Hope Hands currently has no official website. Communication relies on WhatsApp groups and a Facebook page updated irregularly.

Competitor Analysis: Compared to "Ikusasa Community Centre" which has a basic website, Hope Hands lacks online credibility and cannot rank on Google. This limits donor trust and accessibility for parents without Facebook.

Key Weakness: No central information hub, no donation tracking, and no professional presence to attract funding.

4. Proposed Website Features and functionality

Core Pages: Home, About Us, Programs, Get Involved, Gallery, Contact.

Key Features:

Donation CTA Button: Sticky "Donate Now" button on all pages linking to bank details.

Volunteer Application Form: Online form capturing name, skills, availability. Programs Section:

Detailed descriptions of tutoring, feeding scheme, and computer classes with schedules.

Photo Gallery: Show impact of feeding schemes and learner achievements. Contact Page:

Google Map embed, phone, email, physical address.

5. Design and User Experience

Aesthetic and Brand Identity: Warm, trustworthy, and community focused. Design should evoke hope and professionalism to build donor confidence.

Colour Scheme: Orange #FF6B35 - energy, optimism, call-to-action buttons Navy Blue

#1E3A8A - trust, stability for headers/footers White #FFFFFF - clean backgrounds for readability

Typography: Headings: Montserrat Bold. Body: Open Sans Regular. Hierarchy: H1 32px, H2 24px, H3 20px, Body 16px.

Layout and UX Considerations: Mobile-first single column layout. Large touch targets for mobile users. Clear navigation bar. Fast loading under 3 seconds. High contrast for accessibility.

Wireframes: Low-fidelity wireframes created for Home, About, Programs, and Contact pages showing header, navigation, content blocks, and footer. [Insert screenshot of wireframes here]

6. Technical Requirements

Hosting: Shared hosting plan with Afrihost for cost efficiency and 99.9% uptime.

Domain Name: hopehands.org.za -.org.za builds trust for NPOs.

Languages/Technologies: HTML5 for semantic structure, CSS3 for styling, JavaScript for form validation. No frameworks needed for static 5-page site.

7. Timeline and Milestones

Week 1-2: Research content, gather photos, create sitemap and low-fi wireframes.

Week 3-4: Develop HTML structure for all pages, integrate text content.

Week 5-6: Apply CSS styling, ensure responsive design for mobile and tablet.

Week 7: Cross-browser testing, fix bugs, optimize images for speed.

Week 8: Deploy to hosting, final submission and documentation.

8. Budget

Estimated Costs Year 1: Domain Registration.org.za: R150 per year Shared Web Hosting: R70/month = R840 per year SSL Certificate: Free via Let's Encrypt Total: R990 per year. Development costs R0 as completed by student as part of academic project. Future maintenance can be done by volunteer.

PROPOSAL 2: SWEET TREATS BAKERY

1.Organisation Name: Sweet Treats Bakery

History: Sweet Treats is a small home-based bakery in Pietermaritzburg, started in 2021 by owner Nomsa Dlamini. Specializes in custom birthday cakes, cupcakes, and catering for small events. Built reputation through Instagram and word-of-mouth, now ready to expand online.

Mission Statement: To create delicious, beautifully designed baked goods that bring joy to every celebration, using quality ingredients and personal service.

Vision Statement: To become Pietermaritzburg's go-to bakery for custom cakes and memorable dessert experiences.

Target Audience: Primary: Mothers planning children's parties, aged 25-40. Secondary: Small businesses ordering catering, wedding planners.

2. Website Goals and objectives Primary Goals:

Generate 15+ qualified cake order enquiries per month via online form. Showcase portfolio to justify premium pricing and attract higher-value orders. Reduce time spent answering "Do you deliver?" and "What flavours?" by putting info online.

Measurable KPIs: Number of "Request Quote" form submissions monthly. Instagram link clicks from website. Mobile phone click-to-call usage.

3. Current Website and Competitive Analysis

Current State: No website. All orders via Instagram DM and WhatsApp.

Competitor Analysis: "The Cake Studio PMB" has a website with gallery and prices, ranking higher on Google for "custom cakes Pietermaritzburg". Sweet Treats loses customers who Google first.

Key Weakness: Cannot be found via Google search, no 24/7 catalogue for customers to browse.

4. Proposed Website Features and functionality

Core Pages: Home, About, Menu/Gallery, Order/Quote, Contact.

Key Features: Product Gallery: High-quality images of cakes categorized by occasion. Request

Quote Form: Fields for date, flavour, size, design ideas. Menu with Prices: Starting prices per cake size to qualify leads. Click-to-Call + WhatsApp Button: Sticky button for mobile users.

Delivery Areas Map: Shows suburbs serviced in PMB.

5. Design and User Experience Aesthetic and Brand Identity:

Sweet, elegant, and appetizing. Design should make cakes look premium and mouth-watering.

Colour Scheme: Pink #F472B6 - sweetness, femininity for accents Cream #FFF7ED - warm, bakery background Brown #78350F - chocolate, richness for text Typography: Headings: Playfair Display - elegant script feel. Body: Lato - clean and readable. Hierarchy: H1 34px, H2 26px, Body 16px.

Layout and UX Considerations: Grid layout for cake gallery. Large images with minimal text.

Sticky "Order Now" button on mobile. Simple 4-field order form to reduce friction.

Wireframes: Low-fidelity wireframes for Home with hero cake image, Gallery grid, and Order form page. [Insert screenshot of wireframes here]

6. Technical Requirements

Hosting: Lite hosting plan with xneelo for local South African servers and speed.

Domain Name: sweettreatsbakery.co.za -. co.za is standard for local businesses.

Languages/Technologies: HTML5, CSS3, JavaScript. Use Form spree or Netlify Forms for order form backend without server code.

7. Timeline and Milestones

Week 1: Competitor research, take product photos, create sitemap.

Week 2-3: Write content, design wireframes.

Week 4-5: Code HTML + CSS desktop layout.

Week 6: Implement mobile responsiveness and form functionality.

Week 7: Basic SEO, Google My Business linking, launch site.

Week 8: User testing with 3 customers, final fixes and submission.

8. Budget

Estimated Costs Year 1: Domain Registration.co.za: R120 per year Lite Web Hosting xneelo: R59/month = R708 per year SSL Certificate: Free via Let's Encrypt

Total: R828 per year. Photography done with phone to save costs. Student development = R0.
